Nurses and Therapists

Home Health provides skilled nursing and therapy visits to patients in their homes. These services are covered by Medicare and most private insurances. Home Health is ordered by a physician after a hospital stay or a doctor's appointment as a means to return the patient to his/her optimal level of health and independence.

Home Health Care Services Include:

- **40+ Full-Time Therapists** utilizing evidenced-based therapy to achieve measurable outcomes.
- Our **Orthopedic Team** provides comprehensive post-joint replacement care, with proven results that get our patients back to doing the things they love quickly and with less pain.
- Our **Speech Therapy** services benefit anyone having difficulty swallowing food, pills, or liquids; or presenting with dementia or memory deficits.
- Our **Maintenance Therapy** is designed to keep patients out of the hospital, and is ideal for patients with neurological conditions, chronic progressive diseases, and those with repeated falls.
- Our Therapists can skill a patient under both **Medicare Part A & Part B**, allowing optimal utilization of services while minimizing **out-of-pocket expenses** to the patient.

Private Duty Nursing

Private Duty Nursing Services are for patients of all ages with advanced needs, requiring longer blocks, or shifts, of nursing care.

Private Duty Nursing Includes Care for:

- Behavioral & Developmental Disabilities
- Trach/Ventilators
- Feeding Tubes (G/J-Tube, NG, G-Tube)
- Quadraplegia/Paraplegia
- Seizure Disorders
- Infants with congenital anomalies
- Medication Administration
- Management of chronic diseases
- Other special needs

Tele-Health

Medical Alert Button: Our medical alert buttons connect to a phone line and can dial a family member and/or 911 in an emergency. Emergency buttons can be worn around the neck or wrist.

Medication Reminder Assistant: Dispenses doses of medications at pre-programmed times. With 24/7 monitoring, emergency contacts are immediately notified of missed doses.
